QUADRENNIAL FEATURE ARTICLE INDEX

Where to find and how to obtain major articles appearing in PT DESIGN from 1994 to 1997.

Feature articles in this index are listed by their titles and categorized in one or more of the 10 product categories covered by PTD. Nontechnical articles and technical articles on subjects other than power transmission appear under "Special Interest Features."

You can obtain photocopies of articles for $20 by contacting PT Design at (216) 696-7000; Fax: (216) 696-7648. Articles from the last 5 years can also be downloaded from the Internet. Website address: http:\\www.ptdesign.com

A limited number of magazines are available for $5.00 each. Price includes shipping and handling costs. Prices for reprinting bulk quantities of an article depend upon quantity ordered and are quoted on an individual basis. Contact Phyllis Dixon at (216) 931-9607, for information on reprints.

Permission is granted to users registered with the Copyright Clearance Center (CCC) to photocopy any article, with the exception of those for which separate ownership is indicated on the first page of the article, for a base fee of $1.25 per copy of the article plus 60¢ per page paid directly to the CCC, 222 Rosewood Dr., Danvers, Mass. 01923 (Code No. 0032-6070/97 $1.25 + .60).

Microfilm copies are available in many libraries. Individual articles and complete issues are available in photocopy and microfilm form from University Microfilms International, 300 N. Zeeb Rd., Ann Arbor, Mich. 48106, (313) 761-4700, ext. 222.

Feature article index	Mon.	Yr.	Pg.
ADJUSTABLE-SPEED DRIVES			
Retrofitting old machines improves productivity, quality	Feb	94	47
Simple tips improve servo operation	Mar	94	23
Which type of A-S drive is best?	Apr	94	21
Having these answers on A-S drives will save you time and money	Apr	94	27
Matching A-S drives to applications	Jun	94	17
Dedicated control solves high-speed winding problem	Jul	94	41
Electric steering drives replace hydraulic units	Aug	94	57
Selecting the right servo requires choosing the right communications platform	Sep	94	43
Replacing line-shaft drives with servos improves productivity and quality	Nov	94	20
Adjustable-speed drives — 1995 Handbook	Dec	94	A33
New ac drive technology	Feb	95	49
The best small-motor drive: ac or dc?	Apr	95	21
Understanding center driven web winders — Part 1	Apr	95	27
Cleaning up power line pollution	Apr	95	35
Drives for low-speed, high-torque applications	Apr	95	38
Advances in motion control	May	95	54
Understanding center driven web winders — Part 2	May	95	61
Soft start-stop system calms cable-drive spasms	Jun	95	21
Regeneration with AF drives	Jun	95	27
More choices link motors and drives to controls	Jul	95	33
New motor-mounted A-S drive controller	Jul	95	51
Electronic drive revives aging bindery with new agility	Jul	95	38
Integrating motion control systems	Sep	95	33
The basics of motion control — Part 1	Sep	95	43
The false economy of saving motor-generator sets	Oct	95	63
Frameless motors offer new solutions to precision motion systems	Nov	95	25
Motion system moves liquor quicker	Nov	95	33
Closed-loop gear manufacturing system speeds design-to-manufacturing process	Nov	95	37
Adjustable-speed drives — 1996 Handbook	Dec	95	A17
Power semiconductors for A-S drives	Feb	96	66
The basics of motion control — Part 2	Mar	96	35
Knowing types of servos helps understand system operation	May	96	67
A-S drives power floating pipe plant	Apr	96	21

Adjustable-speed drives — 1996 Handbook	Dec	95	A17
Power semiconductors for A-S drives	Feb	96	66
The basics of motion control — Part 2	Mar	96	35
Knowing types of servos helps understand system operation	May	96	67
A-S drives power floating pipe plant	Apr	96	21

Feature article index	Mon.	Yr.	Pg.
Adjustable-speed drives' passport to Europe: the CE mark	Apr	96	25
Motion control software: no programming required	May	96	71
A-S drives' passport to Europe, Part 2	Jun	96	21
Selecting drives for electric vehicles	Aug	96	51
AIME planning standards for motion system safety	Sep	96	40
Synchronizing packaging motion with servos	Nov	96	25
Motion control in document packaging	Nov	96	33
Adjustable-speed drives — 1997 Handbook	Dec	96	A39
PT system advances continue to raise productivity	Jan	97	20
Dos and Don'ts for A-S drive systems	Feb	97	58
Drive networks: separating fact from market position	Apr	97	35
Eliminating harmonics from the facility power system	Apr	97	43
More specifics on how inverters affect motors	May	97	33
Selecting small step motors and drives	May	97	45
Selecting drive-bus architectures	May	97	49
Comparing drive networks	Jun	97	35
Machine tools: better control of workpiece motion	Jul	97	29
Honey, they shrunk the drive!	Aug	97	37
Retrofitting drives for paper machines	Aug	97	41
The next stage in power semiconductors	Oct	97	31

BEARINGS

Caring for bearings (tapered roller bearings II)	Jan	94	21
Bearing restoration: Whole-life production-line assurance policy	Feb	94	64
Caring for bearings (tapered roller bearings III)	Apr	94	50
Composite bearings live nearly unnoticed in Florida citrus plant	Jun	94	31
Basics of sliding metallic-bearing materials — Part 1	Jun	94	36
Plastic plain bearings help grain-drill clutch	Jun	94	39
All about needle roller bearings	Jun	94	43
Spherical roller bearing basics	Jun	94	51
Central tire inflation tapered-roller bearing	Jun	94	59
Basics of sliding metallic-bearing materials — Part 2	Jul	94	32
Basics of sliding metallic-bearings materials — Part 3	Aug	94	90
Magnetic bearings: an update	Oct	94	73
Caring for bearings (linear bearing lubrication)	Oct	94	76
Basics of sliding metallic-bearing materials — Part 4	Nov	94	56
Bearings — 1995 Handbook	Dec	94	A77
New pillow blocks cut fan maintenance costs	Feb	95	72
Caring for bearings (linear rolling-element bearings)	Apr	95	60
Thin-section bearings excel in sophisticated machines	Jun	95	53
Setting techniques for tapered roller bearings	Jun	95	59
Caring for bearings (linear rolling-element bearings)	Aug	95	60
Basics of sliding metallic-bearing materials — Part 5	Aug	95	62
New techniques simplify production-line bearing installation	Oct	95	79
How coupling types affect bearing forces	Oct	95	52
Plastic bearings excel in contaminated environments	Nov	95	65
Bearings — 1996 Handbook	Dec	95	A79
Caring for bearings (lubrication and maintenance I)	Feb	96	65
New life factors zero-in on accurate bearing life predictions	Mar	96	45
Basics of sliding metallic-bearing materials — Part 6	Apr	96	51
Plastic bearings and rails smooth conveyor ride	Jun	96	17
Bearings deliver more power, last longer	Jun	96	29
Lubricating bearings for tough service	Jun	96	35
Laser offers new hardening option for bearings	Jun	96	43
Selecting and applying cam follower bearings	Aug	96	45
Caring for bearings (lubrication and maintenance II)	Oct	96	78
Bearings — 1997 Handbook	Dec	96	A81
PT system advances continue to raise productivity	Jan	97	20
Basics of sliding metallic bearing materials — Part 7	Feb	97	67
Gears and bearings rise to auto plant challenges	Apr	97	31
Three-in-one bearing does more	Jun	97	23
Should your bearings be put to the test?	Jun	97	27
Why materials and manufacturing impact bearing performance	Aug	97	45
Caring for bearings (shock-pulse monitoring)	Oct	97	34
Centralized lubrication system saves labor and downtime	Oct	97	86

BELT AND CHAIN DRIVES

Chain drive powers large load in oil extractor	Mar	94	82
Choosing special-purpose synchronous belts	Sep	94	53
Belt and chain drives — 1995 Handbook	Dec	94	A123
Belts and planetary gearboxes give reliable parts-handling	May	95	47
Coaxing V-belts to operate more efficiently	Jun	95	69
Pitfalls of interchanging U.S. and metric standard V-belts	Sep	95	55
Belt and chain drives — 1996 Handbook	Dec	95	A105
Plastic sprockets offer drive solutions	Feb	96	61
Engineering class chain tackles big jobs	Mar	96	51
Making the right shaft connection	Aug	96	65

Feature article index	Mon.	Yr.	Pg.
Belt and chain drives — 1997 Handbook	Dec	96	A111
Silencing the synchronous belt	Mar	97	50
Sprockets — the other half of a chain drive	Sep	97	34

CLUTCHES AND BRAKES

Supplier's team designs interior brake for motor builder	Feb	94	21
How to work well with a vehicular brake supplier	Feb	94	25
A true story: The clutch that turned into a wrench	Feb	94	36
Special brakes for ship and shore	Jun	94	24
Plastic plain bearings help grain-drill clutch	Jun	94	39
Clutches and brakes — 1995 Handbook	Dec	94	A145
Clutch slips to shoulder a ship	Feb	95	29
Choosing electric clutches & brakes to meet thermal needs	Feb	95	34
Brakes beat ball screw back drive	Jun	95	35
Clutches and brakes — 1996 Handbook	Dec	96	A129
Accurate indexing without a servo	Feb	96	27
Applying fail-safe brakes to stop and hold	Feb	96	31
Overrunning clutch expands capabilities	Aug	96	55
Clutches and brakes — 1997 Handbook	Dec	96	A135
Selecting the right tensioning system	Feb	97	19
Automated bakery bets dough on oil-shear clutch-brakes	Feb	97	24
Equations simplify drum brake analysis	Jun	97	49
Choosing servomotor brakes	Aug	97	51

CONTROLS AND SENSORS

PCs take on larger role in machine control	Mar	94	19
Current sensors expand precision motion control capabilities	May	94	49
Control system pays off in big energy cost savings	Jul	94	13
Open networks link factory floor devices	Jul	94	19
PLCs get smaller, do more	Jul	94	25
Dedicated control solves high-speed winding problem	Jul	94	41
Electric steering drives replace hydraulic units	Aug	94	57
Preventing machine failures through condition monitoring	Aug	94	65
Show preview: Sensors Expo '94	Aug	94	96
Fuzzy logic: a new tool for the control engineer's toolbox	Sep	94	29
Smart photoelectric sensors add capabilities to factory floor	Sep	94	35
Selecting the right servo requires choosing the right communications platform	Sep	94	43
Synchronizer ends jam-up on cookie line	Sep	94	48
Electrical systems lead the motion control race	Nov	94	16
Selecting and building an automation team	Nov	94	11

Feature article index	Mon.	Yr.	Pg.
Rotary motion sensor combines long life with low cost	Nov	94	54
Controls and sensors — 1995 Handbook	Dec	94	A179
Electronic cams boost machine flexibility, productivity	Mar	95	35
Start condition monitoring to stop machine failures	Mar	95	58
Advances in motion control	May	95	54
New motor-mounted A-S drive controller	Jul	95	51
PLCs bus into the future	Jul	95	19
Using fieldbuses to integrate motor-drives with PLCs	Jul	95	27
More choices link motors and drives to controls	Jul	95	33
Integrating motion control systems	Sep	95	33
Motion system moves liquor quicker	Nov	95	33
Controls and sensors — 1996 Handbook	Dec	95	A159
The basics of motion control — Part 2	Mar	96	35
Tips on selecting a PLC for motion control	Apr	96	57
Knowing types of servos helps understand system operation	May	96	67
Motion control software: no programming required	May	96	71
Frictionless, noiseless drive controls fitness stepper	Jun	96	25
Moving closer to the goal of open control	Jul	96	19
Fast forward to the future of controls	Jul	96	23
Solving common encoder integration problems	Jul	96	33
Using electronic cams for motion control	Jul	96	39
Resolver with a solid rotor	Sep	96	22
Controls and sensors critical to increasing our standard of living	Sep	96	33
Sensors keep pace with motion control needs	Sep	96	35
AIME planning standards for motion system safety	Sep	96	40
Improve encoder performance	Sep	96	43
Synchronizing packaging motion with servos	Nov	96	25
Selecting sensors for packaging motion control	Nov	96	31
Motion control in document packaging	Nov	96	33
Controls and sensors — 1997 Handbook	Dec	96	A163
Communicating to nodes on the run	Mar	97	53
Rugged tachometers handle mill and pulp applications	May	97	67
To PLC or not to PLC	Jul	97	33
Tips on interfacing PC-based control into motion systems	Jul	97	37
Applying solid-state starters	Sep	97	41
Getting maximum use from motors	Sep	97	47
More versatile networks boost motion control capabilities	Sep	97	61
Digital control opens options for packagers	Nov	97	23
Sensing gives packaging a boost	Nov	97	29
Brushing up on motion architectures	Nov	97	46

Feature article index	Mon.	Yr.	Pg.
COUPLINGS AND U-JOINTS			
Compliant couplings give robots gentle but strong touch	Apr	94	37
Couplings meet rigorous requirements of precision positioning systems	May	94	52
Floating shafts make long distance connections	Oct	94	33
Selecting elastomeric couplings to stop vibration	Oct	94	37
Couplings and U-joints — 1995 Handbook	Dec	94	A197
Selecting couplings for large loads	May	95	71
Spiders are key to jaw coupling performance	Oct	95	44
How coupling types affect bearing forces	Oct	95	52
Couplings and U-joints — 1996 Handbook	Dec	95	A175
Couplings offer precise positioning, damping, too	Apr	96	34
Coping with foreign bore and keyway standards	Apr	97	61
Coupling boosts aircraft deicer reliability	Oct	96	53
Making sense out of coupling ratings	Oct	96	59
Coupling does a big stretch	Oct	96	65
Couplings and U-joints — 1997 Handbook	Dec	96	A185
Extending machine life with insulated couplings	Oct	97	19
GEARS AND GEAR DRIVES			
How to analyze gear failures	Mar	94	35
Cooling takes on new importance for speed reducer life	Mar	94	45
EDM speeds cutting of precision gears	Mar	94	48
How to install bevel gears for peak performance	Mar	94	51
Gearing basics	Jul	94	49
Gears and gear drives — 1995 Handbook	Dec	94	A225
Analysis techniques end gear damage	Mar	95	23
Ring gear drives huge grinding mill	Mar	95	29
Precision speed reducers smooth servo motion	Mar	95	43
Belts and planetary gearboxes give reliable parts-handling	May	95	47
Gear efficiency — key to lower drive cost	Jul	95	46
Selecting gearheads and linear actuators	Aug	95	25
Big chill to extend gear life	Sep	95	59
Worm gearhead handles servo demands	Nov	95	29
Closed-loop gear manufacturing system speeds design-to-manufacturing process	Nov	95	37
Gears and gear drives — 1996 Handbook	Dec	95	A199
Powder metallurgy gears gain strength and viability	Mar	96	21
Self-locking worm gears: fact or fiction?	Mar	96	26
Noncircular gears make unconventional moves	Mar	96	29
Shot peening increases gear life	May	96	61
Induction hardening meets new PT challenges	Jul	96	29
Gears and gear drives — 1997 Handbook	Dec	96	A213
PT system advances continue to raise productivity	Jan	97	20
New guidelines promise reliable wind-turbine gearboxes	Mar	97	21
Getting more from plastic gears	Mar	97	27
Gears and bearings rise to auto plant challenges	Apr	97	31
Motion solutions turn to the rack	May	97	61
Gearheads push performance envelope	May	97	70
Saying "hush" to washer transmission noise	Jun	97	56
Gearing up for machine tools	Jul	97	25
Select speed reducers to perform reliably	Oct	97	81
LINEAR MOTION			
Newest linear bearing takes misalignment with no extra stress	Feb	94	61
Tips for choosing high-accuracy linear positioning systems: Part 2	Apr	94	47
Tips for choosing high-accuracy linear positioning systems: Part 3	Jun	94	69
Piezoelectric motorized drive gives precise linear motion	Jul	94	37
Rotary-to-linear step motors take stage lights to new heights	Aug	94	23
The importance of ball-screw end fixity	Aug	94	29
Sewing up smooth linear motion without threads	Aug	94	34
What you should know about ball splines	Aug	94	39
Electric linear actuators: make or buy?	Oct	94	67
Linear motion devices — 1995 Handbook	Dec	94	A275
Selecting lubricants for ball screws	Feb	95	66
Better motion control	Apr	95	55
Brakes beat ball screw back drive	Jun	95	35
Developments in positioning control	Jun	95	41
Better shafts for better linear motion performance	Aug	95	21
Selecting gearheads and linear actuators	Aug	95	25
Hot polymer expands actuator technology	Aug	95	31
Developments in voice coil actuators	Oct	95	67
Linear motion devices — 1996 Handbook	Dec	95	249
Move heavy, unguided loads — vertically	Feb	96	54
The linear motion option	Apr	96	37
Common errors in linear guideway selection	Apr	96	43
Get more life out of that ballscrew	Jun	96	53
Actuator solutions to linear problems	Jun	96	59
Handling the curves	Aug	96	19
Lessons from an engineering fiasco	Aug	96	26
Easier selection of linear actuators	Oct	96	71
Linear motion devices — 1997 Handbook	Dec	96	A273
Linear motors: how to beat the heat	Feb	97	51
Tips on choosing plain linear bearings	Apr	97	53

Feature article index	Mon.	Yr.	Pg.
Linear motion in tight spaces	Jun	97	39
Linear motors step out	Aug	97	21
Designing with miniature ballscrews	Aug	97	25
Complex motion systems spur entertainment industry	Aug	97	29
Handling cables and hoses	Oct	97	37
Protecting linear motion devices	Oct	97	41

MOTORS

When is a motor a 'washdown-duty' motor?	Mar	94	55
AC servomotors hold sway in high-rise buildings	May	94	22
Arc-spray metallizing: where dc motors & SCR drives still win	May	94	27
Things you should know if you design with fhp gearmotors	May	94	33
How to calculate new dc motor parameters of a modified winding	May	94	39
Motor business news	May	94	43
Piezoelectric motorized drive gives precise linear motion	Jul	94	37
Tracking motor vibrations	Nov	94	49
Motors — 1995 Handbook	Dec	94	A339
The race to the electric car	May	95	19
Getting the most from high-efficiency motors	May	95	27
Applying PMDC motors	May	95	33
Choices in modifying motors	May	95	39
Solutions to motor insulation failures	Aug	95	43
Latest developments in superconducting motors	Aug	95	55
Motor standards	Sep	95	63
The false economy of saving motor-generator sets	Oct	95	63
Getting the rotor back up and running	Nov	95	18
Frameless motors offer new solutions to precision motion systems	Nov	95	25
New insulation improves motor reliability	Nov	95	70
Motors — 1996 Handbook	Dec	95	A303
Are switched-reluctance motors for you?	May	96	21
Troubleshooting bearing currents	May	96	27
Motor Challenge saves money and energy	May	96	33
Tips on fitting the best motor	May	96	39
5,000-hp superconductivity by 2000	May	96	44
Good things come in small packages	Jul	96	45
The hot topic of motor temperature	Sep	96	15
Protecting servomotors from self destruction	Sep	96	27
Selecting motors for packaging machinery	Nov	96	21
Motors — 1997 Handbook	Dec	96	A331
Selecting servomotors	Mar	97	35
Sorting out the impact of EPACT	Mar	97	61
Axial airgap alternative for motors	May	97	23
Tips on inspecting for motor insulation damage	May	97	29
More specifics on how inverters affect motors	May	97	33
Confused by NEMA Design E motors?	May	97	37
Selecting small step motors and drives	May	97	45
Selecting high-performance ac spindle motors	Jul	97	21
Matching servo motors and amplifiers	Jul	97	41
Getting more from motor tests	Sep	97	25
Smart motors drive motion system design	Sep	97	65
Keeping step motors from stalling	Nov	97	55
How reflected waves damage ac motors	Nov	97	43

PT ACCESSORIES

Selecting lubricants for ball screws	Feb	95	66
Lubrication tips (replacing lubricants)	Feb	95	74
Lubrication tips (effect of water)	Apr	95	58
Shaft keys revisited	May	95	105
PT accessories — 1996 Handbook	Dec	95	A339
Turning the tables on cam indexer gremlins	May	96	53
Lubricating bearings for tough service	Jun	96	35
Making the right shaft connection	Aug	96	65
PT accessories — 1997 Handbook	Dec	96	A371
Coping with foreign bore and keywat standards	Apr	97	61
Keyless devices get a grip on shafts	Oct	97	23
Centralized lubrication sywstem saves labor and downtime	Oct	97	86
Getting the most from food-grade lubricants	Nov	97	35

Motion programming gets easier	Nov	97	58

Reprints from Power Transmission Design mean business.

Let us put them to work for you.

Reprints of your advertisements and Power Transmission Design articles can be used as:

- ***Direct mail to customers and prospects.***
- ***Sales aids for your people in the field.***
- ***Tools to inform stockholders and employees.***
- ***Training aids for new employees.***
- ***Handouts at trade shows and company meetings.***
- ***New product announcements.***
- ***Follow-ups to ad inquiries.***

For more information about this cost-effective way to get your message out to your customers and prospects, or for a free copy of feature articles available to use with your ad, call Vince Potochar, production manager, at (216) 696-7000.
